EXPERIENCE

Freelance web programming
2024 – 2025

- Developed a responsive event website for a local tech meetup in 2024, which helped increase participant registration by over 60% through improved user experience and mobile accessibility

Final project Apk

- Developed a final-year mobile application project in 2024 that helps tax payment system easier than before. The app was well-received during the project showcase and attracted interest from small businesses looking to digitize their operations.

EDUCATION

Bachelor of Computer Science Faculty of Computational and software engineering
